## Continuation Sheet (PTO-303)

Application No. 009/800,366

Continuation of 2. NOTE: Proposed amendments would require further consideration (e.g., cancellation of claim 28 and amendment of claim 29 to depend from claim 27 and replacing "uniform output signal value" to "output signal"). In addition, proposed amendments raise the issue of new matter (e.g., "The measuring circuit can measure two or more resulting signals associated with each of the two or more bias pulses 510 and can individually control the two or more resulting signals").

Continuation of 10. Other: In regard to proposed cancellation of claim 28, it is noted that applicant has included a mark-up amended version of claim 28. Applicant should note 37 CFR 1.121(c)(1)(II), which states that a marked up version does not have to be supplied for an added claim or a canceled claim as it is sufficient to state that a particular claim has been added, or canceled.
